

Instructions - And this is how it works:

1. Before working the tile, soak it completely for approx. 4-5 minutes in water. This will extend the tool's durability.
2. Install the DIAMOND Tile Saw into your jigsaw like any other jigsaw blade.
3. Install the blade with the diamond coating facing towards cutting direction.
4. Drill a hole of at least Ø 4 mm into the tile.
5. Place the soaked tile on two strips of wood with tile front showing downward.
6. Insert tile cutter in hole and rest jigsaw on back of tile.
7. Cut out designated shape by carefully pressing jigsaw forward.

Attention:

The DIAMOND Tile Saw is not suitable for working material, which does not absorb water for cooling, such as concrete blocks, stoneware, marble etc.!!!
